

GeoStabilization International is on a mission to develop and install innovative solutions that protect people and infrastructure from the dangers of geohazards. We specialize in emergency landslide repairs, rockfall mitigation, and grouting using design/build and design/build/warranty contracting. GeoStabilization's team includes some of the brightest and most dedicated professionals in the geohazard mitigation industry. Our expertise, proprietary tools, and worldwide partnerships allow us to repair virtually any slope stability or foundation problem in any geologic setting.

Why choose GeoStabilization? You already have a history of protecting the public. Why not continue that mission with GeoStabilization?

What is in it for you? In short, a career with significant advancement opportunities. GeoStabilization will provide you with on the job training, give you the skills you need in our exciting industry to grow your career from a Geohazard Mitigation Technician to a leader with GeoStabilization! We have a strong history of promoting from within and we want you to become a future leader with us.

What is a typical day like at GeoStabilization? This is not a 9 to 5 job where you punch in and punch out. No two days are the same. Every day is a new adventure with new challenges that will need new solutions from you.

What is the culture like at GeoStabilization? We believe that company leadership, managers, and every person in our offices are here to serve you! This is normal at GeoStabilization. We have spent decades building a culture revolving around mission, service and honor that means always do the right thing and we have each other's back.

With GeoStabilization you can expect:

- Safety, quality, and production; Always in this order and no exceptions
- Comradery and the continuing opportunity to build lifelong friendships
- GeoStabilization has been recognized as one of the best places to work
- A real entrepreneurial spirit that shows itself in a team focused environment that will give you the ability to work with your hands, outdoors in new and challenging environments and grow your career.
