MISCELLANEOUS:

U.S. Citizen required. Must pass extensive background investigation.

Principal Software Architect - Remote, US: https://www.bullhorn.com/careers-portal/#/jobs/3354

As a **Principal Software Architect** at Bullhorn, you will work closely with product managers, UX designers, and developers to guide the evolution of our software and our teams. You'll be helping the team create a vision for our software and work closely with the development teams to make that vision a reality.

You will help identify, research, and design new solutions to define complex features, breakthrough scalability and performance bottlenecks, and help improve system health. As a Principal Architect, you'll also be mentoring and guiding best practices across multiple development teams.

Why this job is important:

- Software architects help ensure that our software and our teams are running at their best by solving key technical challenges and promoting best practices.
- Architects also help our team define practical solutions and best practices and guide the team towards them.
- Architects also mentor and coach engineers to recognize better patterns and see the bigger picture.
- Principal architects help cultivate a practice of consistent patterns and processes across multiple teams.

As a Software Architect, a typical day might include:

- Shepherding multiple development teams and junior architects in building towards best practices and software health.
- Collaborating with product managers, UX designers, and engineers to design creative features to advance our platform.
- Identifying solutions to technical team impediments, and finding ways to make our development practice better.
- Defining architectural principles, patterns, and best practices.
- Mentoring and coaching engineers and junior architects to adhere to those best practices.

This job might be for you if:

- You have 10+ years of experience designing and building software for scalable, fault-tolerant distributed systems.
- You have demonstrated success in mentoring development teams in consistent architectural best practices
- You have strong experience building Software as a Service (SaaS) products
- You're a tech guru with a passion for continuous improvement who's excited by finding better designs for software and data.
- You are comfortable with J2EE, Angular, SQL Databases, and open source technologies

Bonus points for:

- Bachelor's Degree or higher in Computer Science or a related field

AWARD BENEFITS

The Science, Mathematics, and Research for Transformation (SMART) Scholarship-for-Service Program is an opportunity for students pursuing an undergraduate or graduate degree in Science, Technology, Engineering, and Mathematics (STEM) disciplines to receive a full scholarship and guaranteed civilian employment with the Department of Defense (DoD) upon degree completion. The application window opens 1 AUG. For more information, visit the SMART Scholarship-for-Service Program website at: https://www.smartscholarship.org/smart?id=smart_index .

Here is the LinkedIn profile for an Army Civilian who earned her PhD using this scholarship program: https://www.linkedin.com/in/kari-mckenzie-9b122a23/ . Her undergraduate and graduate degrees are in Kinesiology. Her PhD concentration is Rehabilitation Science.

Applicants **MUST** be pursuing a technical degree in one of the 21 STEM disciplines listed below. Technical degrees include programs specializing in science, mathematics and engineering (as listed in the 21 approved disciplines). Non-technical degrees include management, arts or humanities degrees that are not approved or funded by SMART. Students pursuing technical degrees related to the following are encouraged to apply:

 Aeronautical and Astronautical Engineering
   Biosciences
   Biomedical Engineering
   Chemical Engineering
   Chemistry
   Civil Engineering
   Cognitive, Neural, and Behavioral Sciences
   Computer and Computational Sciences and Computer Engineering
   Electrical Engineering
   Environmental Sciences
   Geosciences

 Industrial and Systems Engineering (technical tracks only)
   Information Sciences
   Materials Science and Engineering
   Mathematics
   Mechanical Engineering
   Naval Architecture and Ocean Engineering
   Nuclear Engineering
   Oceanography
   Operations Research (technical tracks only)
   Physics
